EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Franklin E. Gibbs on March 31, 2008.

The application has been amended as follows:

In the Specification:

page 9, line 31 – page 10, line 1, delete "Furthermore, the internal shape of the shell of a particular module habitat is not necessarily fastener."

page 10, line 31, replace "steel and the longerons are" with -- steel. --

In the Claims:

Claim 1: line 31, replace "volume." with

--volume;

the modular human habitat simulator further comprising:

a plurality of simulated water bags fixedly attached to the interior surface;

at least a portion of a simulated debris shield fixedly attached to the external surface; and

a plurality of cylinders, wherein the cylinders simulate storage requirements of gases or liquids, wherein the number and location of the cylinders is dependent on a mission and experimental scenario. --

Claim 5: CANCELLED

Claim 6: CANCELLED

Claim 11: line 2, replace "further including a plurality of cylinders" with -- wherein the cylinders are --

Claim 16: line 2, replace "further including a plurality of cylinders" with -- wherein the cylinders are --

Claim 17: line 39, replace "enclosure." with

--enclosure;

the modular human habitat simulator further comprising:

a plurality of simulated water bags fixedly attached to the interior surface;

at least a portion of a simulated debris shield fixedly attached to the external surface; and

a plurality of cylinders, wherein the cylinders simulate storage requirements of gases or liquids, wherein the number and location of the cylinders is dependent on a mission and experimental scenario. --

Claim 18: line 22, replace "longeron." with

--longeron; wherein the at least one longeron is not required to be fully functional;

attaching a plurality of simulated water bags to an interior surface of the housing;

attaching at least a portion of a simulated debris shield to an external surface of the

housing; placing a plurality of cylinders within the first distal enclosure, second distal

enclosure, and the internal volume of the housing, wherein the cylinders simulate storage

requirements of gases or liquids, wherein the number and location of the cylinders is

dependent on a mission and experimental scenario. --

Claim 19: line 21, replace “longeron.” with

dependent on a mission and experimental scenario. --

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Patentability seen in, although not limited to independent claims 1, 17, 18, and 19. The primary reason for the allowance of the claims is the inclusion of the specific simulated elements provided to simulate a deployed state of an inflatable human habitat. These simulated elements include at least one of the following, a rigid wall having an interior surface of generally the shape of a deployed inflatable shell internal surface of a human habitat; simulated water bags; a simulated debris shield; and cylinders that simulate storage requirements of gases or liquids, wherein the number and location of cylinders is based on a mission and experimental scenario.

The closest prior art of record does not teach or fairly suggest the claimed features. For instance, the claimed human habitat simulator closely resembles the structure of actual inflatable habitats such as the inflatable vessel described in Raboin et al. US 6,574,189. However, Raboin et al. fail to disclose or suggest the claimed simulated elements described above. In addition, space vehicle simulators such as Zeff et al. disclose some simulated elements, such as simulated life-support equipment. However, Zeff et al. fail to disclose the claimed simulated elements and also fail to teach any structure that resembles a deployed state of an inflatable human habitat.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Zeff et al. (US 3,295,223) – disclose a space training capsule.
- Schueller (US 3,084,454) – discloses an aerospace environment simulator.

Art Unit: 3714

- Simpson et al. (US 3,534,485) – disclose a space environmental simulator that simulates hard vacuum conditions of outer space.
- Hewes (US 3,281,964) - discloses a space station simulator.
- Chauhan (US 6,641,485) – discloses a space ride simulator that allows a user to experience weightlessness.
- House Jr. (US 3,468,533) - discloses a simulated space ride.
